Dear Sir/Madam,

I am writing to express my interest in AI /ML Engineer ,as I believe my background in bioinformatics and experience in developing and delivering robust software solutions make me a strong fit for the position.

I have a Bachelor's degree in cellular and molecular biology and currently, I am doing a master's degree in bioinformatics, where I gained extensive experience in data analysis, and machine learning. During my studies, I developed a deep understanding of the impact of computational biology on curing severe diseases. This was further strengthened during my internship at the German Institute for Nutrition, where I worked on detecting epigenetic biomarkers for prediabetic patients using machine learning methods.

In addition to my experience in machine learning, I have a keen interest in deep learning, which has motivated me to develop my skills in this domain. This expertise in deep learning has enabled me to work with image and video data, which are particularly challenging domains that require specialized knowledge in order to be properly analyzed and processed. With my expanded skill set, I am able to approach these tasks with an efficient level of understanding and proficiency, allowing me to provide more effective solutions to problems related to image and video data.

I I am eager to expand my knowledge about the practical applications of machine learning, especially in the realm of automating workflow processes to enhance product information management for customers. Collaborating with seasoned experts in a dynamic and inventive setting will equip me with the necessary resources to improve my abilities and create a significant difference in this domain.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and how I can contribute to your team.

Sincerely,

Masoumeh Vojood
